POSTER PROBLEMS - DRAG RACER DRAGONFLY SLIDE #2

Drag Racer Dragonfly

A common green dragonfly, the fastest insect in the world, can fly a distance of 50 feet in 2 seconds.

Composing Original Dragonfly Word Problems

Make up two of your own dragonfly problems!

- ▶ Decide how fast your dragonfly flies. Use the same rate in both problems your team creates.
- ▶ Make one problem **give you the time** and ask you to calculate the distance.
- ▶ The other problem will **give the distance** and have you calculate the time.
